This guide will help you find and use good quality, relevant sources of information for Nursing and Healthcare available via University Library Services.

**Library Website**

londonlibrary.sunderland.ac.uk

Our website links to all University Library services and is your starting point to find books, journal articles and dedicated pages for Nursing and Healthcare.

**My Module Resources (MMR)**

My Module Resources (MMR) is your online reading list service. It provides real time information about the availability of essential resources recommended by tutors. Using MMR you can explore a range of resources such as books, e-books, journal articles and websites, easily in one place.

MMR links directly from your SunSpace module and the Library website. It is smartphone friendly allowing you to access your reading list on the move. Search for your module code or title to get started.

**Library Catalogue**

Our collection includes hundreds of print books, and many more e-books on Nursing and Healthcare topics. The Library Catalogue will help you search and locate books in the Library, and read e-books. You can access the Library Catalogue from our website or the catalogue terminals in the Library.

You can search by author, book title or keywords. Click on the title of the book to see the full details, how many copies we have, and where they are located on the shelves. Nursing and Healthcare books are generally classed under, but not limited to, 360 and 610 on the shelves. To read e-books you will need to log in with your University User ID and password.
Discover
Discover gives you access to most reliable, up-to-date academic and industry publications. It allows you to search a wide range of resources simultaneously, including journal articles, conference proceedings, company profiles, market and sector analysis, business news, etc. Click on Discover link on the library website, and log in using your University User ID and password. You can find more information on how to use Discover under the Resources pages on our website.

Key Nursing and Healthcare Resources

Cinahl
The world’s most comprehensive source of full text for nursing & allied health journals EBSCO (professional development collection). A highly specialized collection of electronic information especially for professional educators. This collection offers information on everything from children’s health and development to cutting-edge pedagogical theory and practice.

Embase
A major biomedical and pharmaceutical database covering the following fields: drug re-search, pharmacology, pharmaceutics, toxicology, clinical and experimental human medicine, health policy and management, public health, occupational health, environmental health, drug dependence and abuse, psychiatry, forensic medicine and biomedical engineering/instrumentation.

Pubmed
Contains citations for biomedical literature from MEDLINE, life science journals, online books, PubMed citations and abstracts include the fields of medicine, nursing, dentistry, veterinary medicine and healthcare.

Science Direct
Offers full-text Elsevier journals plus abstracts and table of content (TOC) for non-Elsevier titles. Coverage is predominantly science based but does cover a range of nursing and healthcare titles.

Web of Science (ISI)
Includes Arts & Humanities Citation Index.

INFORMATION LITERACY SESSIONS
In addition to the resources provided in the Library and online we offer a number of sessions developed to improve your information literacy skills and help you to use library services to your best advantage. To arrange a session and find out more, speak to a member of staff or visit the Library website.
